1,000+
students trained

17 working
professionals as faculty

20+
successful
batches

Over the past three years, Special 40 has continued to be a leading example of skill development for finance students and professionals. We have helped graduates and working individuals build strong careers through quality training in accounting, taxation, and business. Our constant goal has been to bridge the gap between classroom learning and the practical skills required in today's job market.

As we progressed, many learners expressed the need for a more flexible, online format. In response to this growing demand—and to carry forward the success of our program—we are now introducing the online edition of our flagship course, AFM Gulf, making quality, career-oriented training accessible anytime, anywhere.

**Join the elite commerce and finance professionals
across the country – now from anywhere, online!**

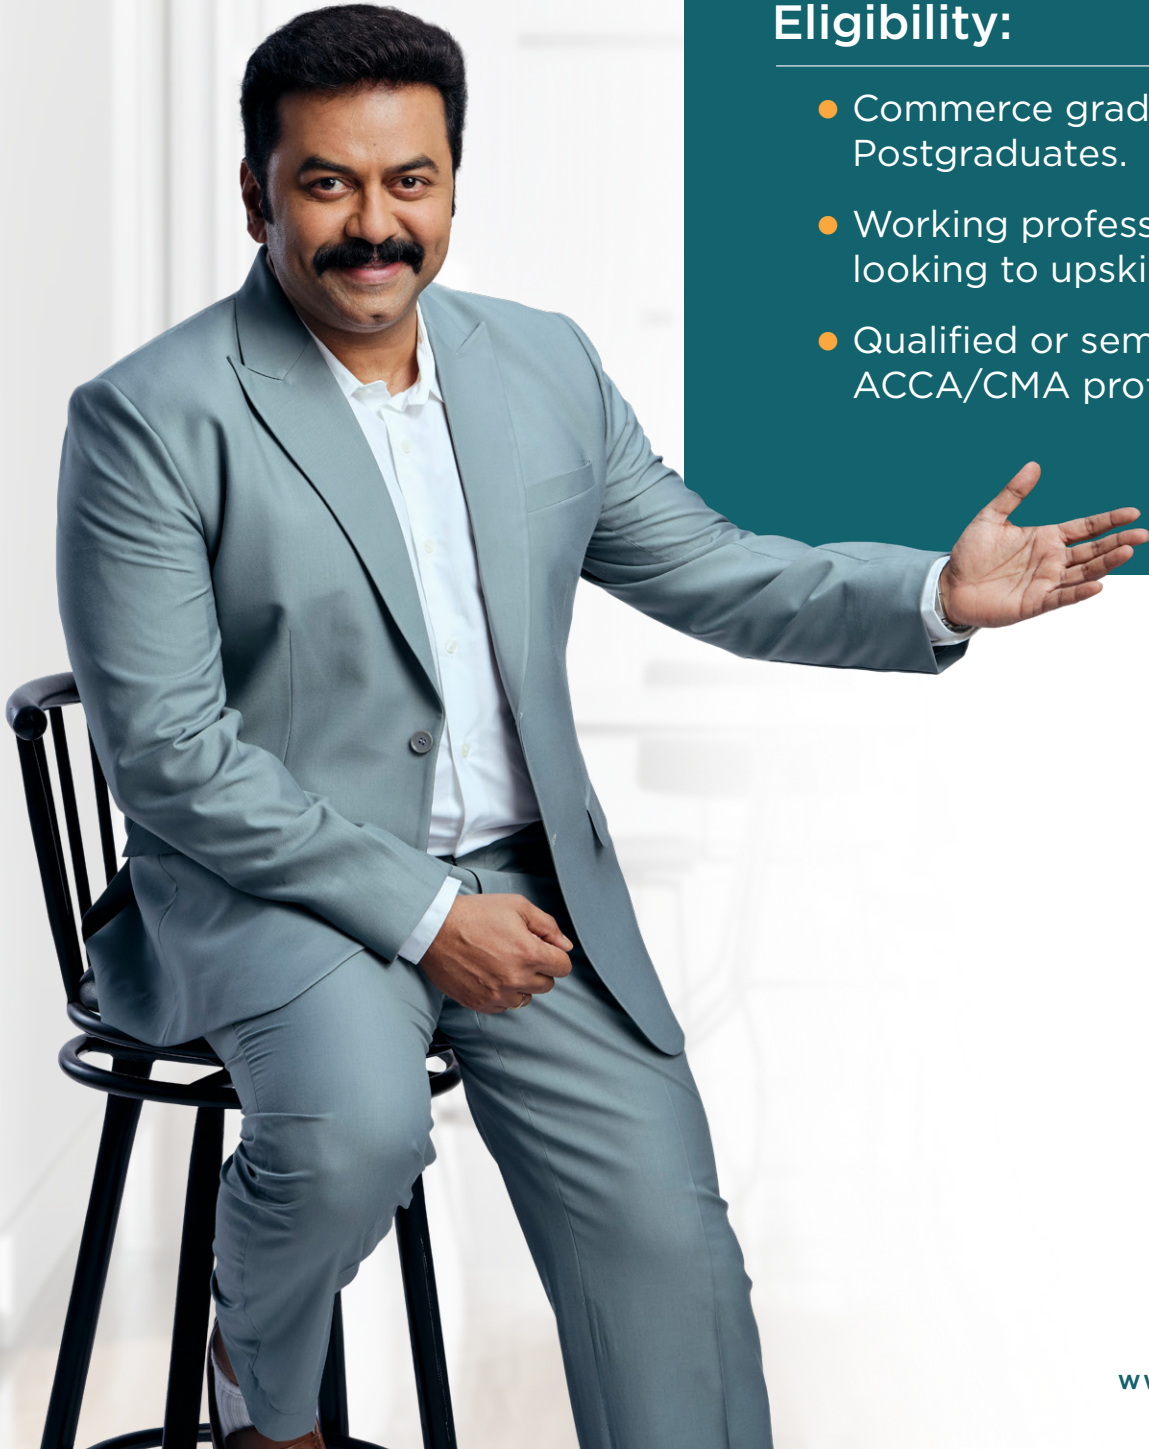

What is AFM Gulf?

An accounting career in the Gulf requires a distinct perspective and specialized skills beyond what is typically expected in India. Proficiency in areas such as Taxation, financial reporting across diverse industries, and an understanding of the regional business environment is essential.

Without adapting to these specific requirements, Indian accounting qualifications and skills alone may fall short of Gulf employers' expectations.

AFM Gulf is an upskilling program by Special 40, designed for commerce professionals and aspirants to take their careers a step further and align with Gulf market demands.

Who is it for?

Anyone aiming to start or grow an accounting career in the Gulf.

Eligibility:

- Commerce graduates & Postgraduates.
- Working professionals looking to upskill their careers.
- Qualified or semi qualified ACCA/CMA professionals.
